

From the American Community Survey: 1999

Population and Housing Profile: Flathead - Lake, Montana

NOTES: The population estimates in this profile are for people living in households and group quarters.

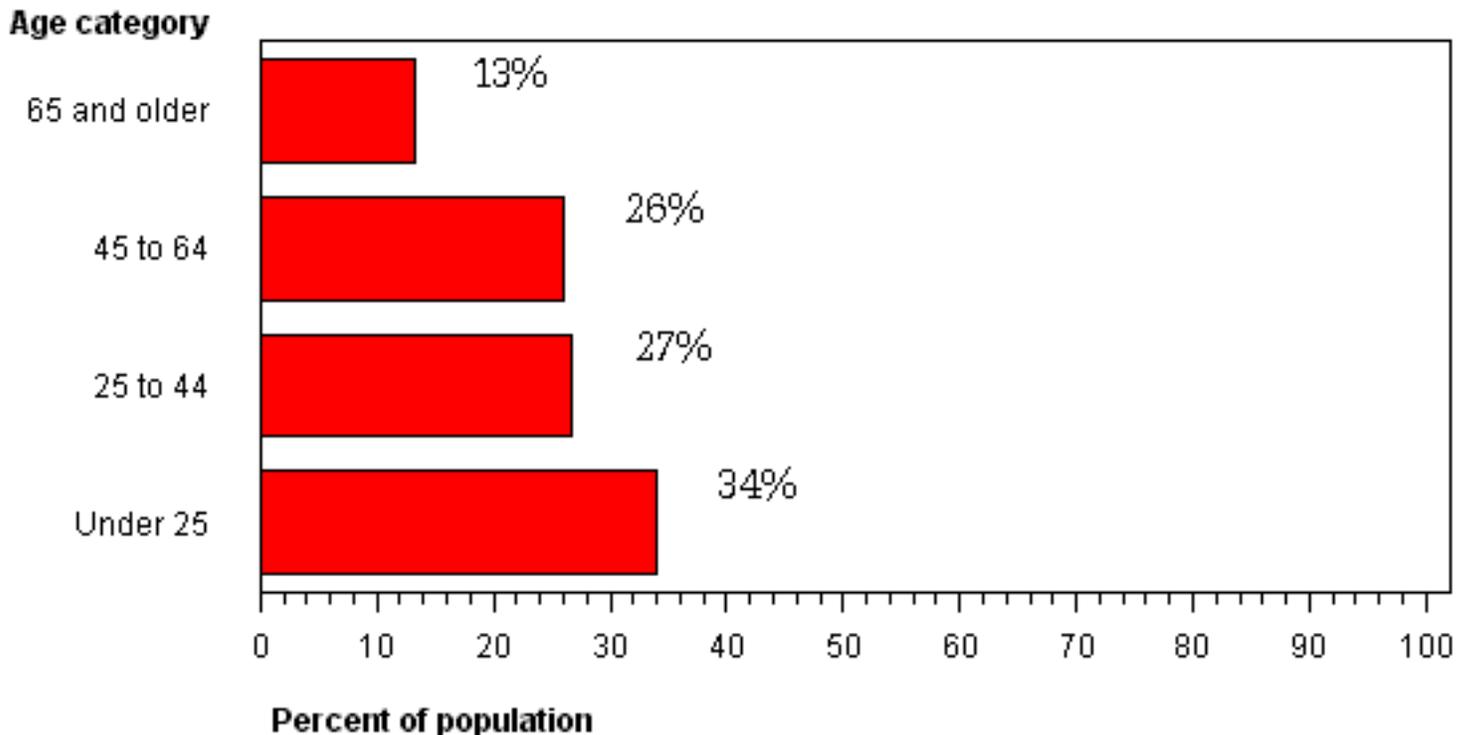

In the narrative profile below, if one sample estimate is larger than another, it does not necessarily mean that the same holds for their true values for the entire population. These estimates are derived from a sample of housing units and measure the true values with a degree of uncertainty. In the Profiles found at www.census.gov/acs/www/index_c.htm, this uncertainty is represented by the 90 percent confidence interval given for each estimate. For further information on confidence intervals see the Accuracy of the Data documents at www.census.gov/acs/www/index_b.htm.

Caution should be used when comparing data by race from previous years with those for 1999 due to the Census Bureau's implementation of the October 1997 revised standards for data on race and ethnicity. For the 1999 data, respondents may report one or more races and there are seven (American Indian and Alaska Native, Asian, Black or African American, Native Hawaiian and Other Pacific Islander, White, some other race, and two or more races) instead of five racial tabulation categories. The two or more races category includes all respondents who reported more than one race. See the methodology section for more details regarding these changes.

These data are preliminary and should not be used for official purposes.

POPULATION OF Flathead - Lake: In 1999, Flathead - Lake had a population of 98,658. The median age was 39.0 years. Twenty-six percent were under 18 years and 13 percent were 65 or older. There was an equal amount of women and men.
